ABOUT WILLOUGHBY STAINLESS FOUNTAINS (WSF)

WSF is your online connection to the stainless steel, outdoor drinking fountains, bottle fillers, showers, and more produced by our parent company, Willoughby Industries, Inc. WSF constructs every fixture out of stainless steel—every time, period—in our 250,000 square foot facility on the northwest side of Indianapolis, Indiana.

How did we get started?

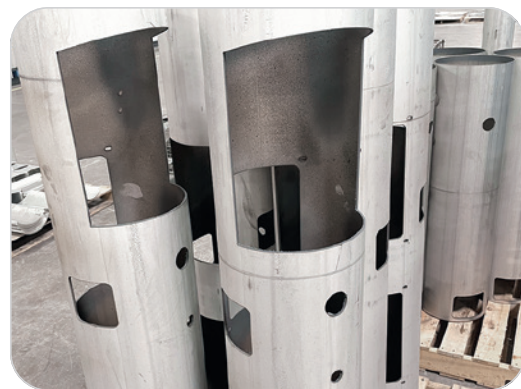

After noticing that standard mild steel and aggregate drinking fountains seemed to decay at an accelerated rate, WSF knew we could help eliminate this problem.

Having origins in the demanding correctional plumbing fixture market, we brought this expertise to the outdoor drinking fountain market. We know how to make competitively-priced, long-lasting fixtures from stainless steel!

Why stainless steel?

The strength and corrosion resistance of stainless steel makes it extremely durable and less vulnerable to the elements, as well as vandalism.

That is why WSF only uses Type 304 and Type 316 stainless steel when fabricating our fixtures! Meaning all of our products will stand up to the test of time while still being aesthetically pleasing and easy to maintain.
